

Is there a way to add breadcrumbs to a data table? I have tried a few different options like manually adding to the menu and setting the path to no avail. Thanks.

Breadcrumbs don't appear on content that isn't part of the main menu. You can add a data table to the menu and it will have breadcrumbs.

However, adding the data table to the menu means that the right rail will appear on the node, which takes up a lot of space and reduces the table width.

Additionally, in this particular example case, there is a superfluous directory in the path (contracts) which is causing some problems.

1. Correct the URL alias (remove “contracts/”)

The screenshot shows the Drupal content edit page for a node. The main content area contains a table with the following data:

Worldview Trading Company	Alpharetta, GA	10/22/1998	Other
Wright Tool Company	Troy, MI	5/6/2010	Other
Yazoo Power Equipment	Jackson, MS	2/1/2001	Contract Default

Below the table are links for "Table Options" and "Import from CSV". The "Text format" is set to "Full HTML". A sidebar on the left contains several expandable sections: "URL path settings" (highlighted with a pink box), "Comment settings", "URL redirects", "Meta tags", and "Authoring information". The "URL path settings" section is expanded, showing the current "URL alias" as "government-agencies/procurement/contracts/debarred-vendors". A pink arrow points to the "contracts/" part of the alias, indicating it should be removed. Below the alias field is a text input for an alternative URL and a checkbox for "Generate automatic URL alias".

2. Remove any URL redirects

The screenshot shows the Drupal content edit page for the same node. The main content area is identical to the first screenshot. The sidebar on the left is the same, but the "URL redirects" section (highlighted with a pink box) is expanded. It shows a table of URL redirects pointing to this node:

FROM	TYPE	LANGUAGE	COUNT	LAST ACCESSED	OPERATIONS
government-agencies/procurement/debarred-vendors	Default (301)	English	0	Never	Edit Delete

The "Delete" link in the "OPERATIONS" column is highlighted with a pink box. Below the table is a link to "Add URL redirect to this node".

3. Add the data table to the menu, using the correct URL. If editing an existing menu item, correct the URL in the card (remove “contracts/”). Choose the Parent link and Save.

Add content Find content Blocks

Main menu

List links Edit menu Translate

[Home](#) » [Administration](#) » [Structure](#) » [Menus](#) » [Main menu](#)

Menu link title *

The text to be used for this link in the menu.

Path *

The path for this menu link. This can be an internal Drupal path such as `node/add` or an external URL such as `http://drupal.org`. Enter `<front>` to link to the front page.

Enabled
Menu links that are not enabled will not be listed in any menu.

Show as expanded
If selected and this menu link has children, the menu will always appear expanded.

Parent link

The maximum depth for a link and all its children is fixed at 9. Some menu links may not be available as parents if selecting them would exceed this limit.

Weight

Optional. In the menu, the heavier links will sink and the lighter links will be positioned nearer the top.

Use Alternative Mega Menu Design
When checked, use the alternative mega menu design for this menu item.
