

NC Social Share is a standard block with no configuration. It is set up to appear on every page that uses the standard page template. It provides social share icons for Facebook and Twitter. It appears on the page by using a custom region called "social_share" which the theme has been updated to support.

Configuration

If this new block does not appear on the pages once the module is enabled, do the following:

1. Go to Structure -> Blocks
2. Find the block titled "NC Social Share".
3. Using the pull-down menu, select "Social Share."

4. Click on "Save Blocks"

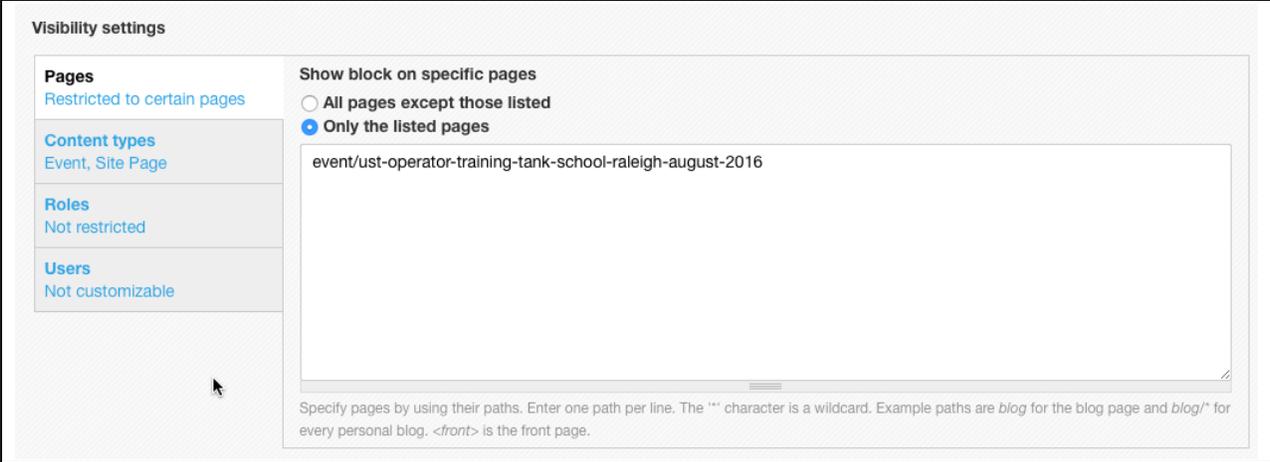

Visibility Settings

To configure which pages or content types the block displays on:

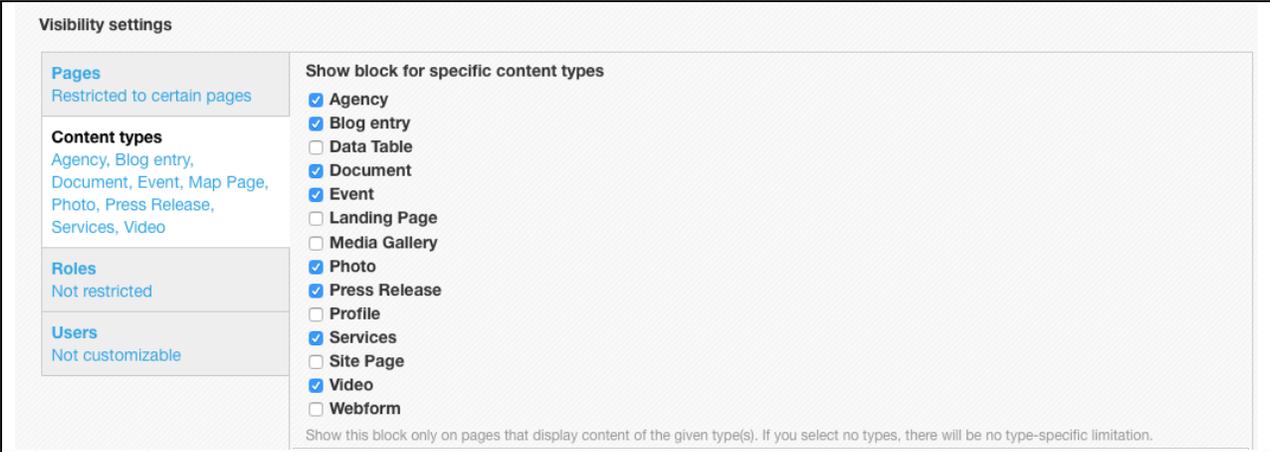

1. Go to Structure -> Blocks
2. Find the block titled "NC Social Share".
3. Click "Configure"

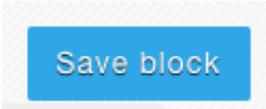

4. Under the **Pages** tab, you can select to show on all pages except those listed (of designated content types), or only specific pages regardless of content type.

5. Under the **Content types** tab, you can select the block to show on all pages of a specific content type. The following types are NOT recommended: Data Table, Landing Page, Media Gallery, Profile, Site Page, Webform.

6. Click **Save block**.

The Social Share block will automatically appear on the page(s) you designated.
